# **SKILLS**

#### **LANGUAGES**

JavaScript

Ruby

SQL

**HTML** 

CSS

MUMPS (M)

### **DATABASES**

**PostgreSQL** 

**SQLite** 

#### **TECHNOLOGIES**

React

Redux

jQuery

AJAX

**RSpec** 

Ruby on Rails

Heroku

Git

## **EMPLOYMENT HISTORY**

Epic Systems Verona, WI

Mar 2015 - Apr 2016

**Technical Service Analyst** 

Developed server utility to search for scheduled blocks resulting in improved analysis of OR usage statistics.

Developed server utility in MUMPS to search for & update open "Episodes of Care" by date and type.

Debugged code and build errors brought by analysts and

clinicians at several major healthcare organizations.

Max Planck Inst. HD, DE

Nov 2014 - Feb 2015

**Design Intern** 

Produced detailed designs and assemblies of opto-mechanical components with Creo Parametric.

Lima S.R.L. MB, IT Jun 2014 - Oct 2014 **Production Intern** 

Created program to model future inventory requirements using historical data acquired from SQL queries.

### **PROJECTS**

Formulator | Live | Repo

A multipage, form building арр

React, Redux, Ruby on Rails

Backend transactions ensure that permanent SQL statements are created for submissions and entries only if they succeed as one atomic unit.

Form builder tab component allows for compartmentalization of functionality and smooth user experience.

Use of currying upon creating fields wraps potential user responses and drives submission process.

Flow Sim | Live | Repo A fluid visualization tool JavaScript, JQuery

Canvas implementation allows for realistic depiction of fluid flow over time.

Lattice Boltzmann solver determines flow based on streaming and colliding particles.

RubyArchive | Repo

An ActiveRecord inspired ORM

Ruby

Facilitates the creation of models whose data requires persistent storage to a SQLite database.

Searchable module allows for string based queries or queries built with hashes.

## **EDUCATION**

**App Academy NY, NY** 

Oct 2016 - Jan 2017

**Web Development** 

1000 hour full-stack programming coding school with <3% acceptance rate.

McGill University QC, CA

Sept 2010 - May 2014

**Bachelor of Engineering** 

Major in Mechanical Engineering, GPA: 3.25 Notable Courses: Linear Algebra, Numerical Methods,

Ordinary Differential Equations, Partial Differential Equations,

Computers in Engineering
